

The First Milking Inflation specifically designed from top to bottom for **JERSEY DAIRY COWS**

Mouthpiece and mouthpiece chamber designed especially for **Jersey** teats

The proven and patented mouthpiece design®, **Circle of Hexagons™**, that stands up to high butterfat exposure and the physical demands of milking

Special "indent" feature for achieving proper alignment and placement during milking

Available with Air Vents to prevent flooding of the inflation and to help prevent cross contamination from milk droplets "impacting" on the teat ends during milking

A shorter tailpiece preventing milking units from touching the floor during attachment

The latest design in reinforcement rings to provide proper shut-off as well as prevent claw cuts

The "SQUARE BODY" will provide a gentle and full collapse on **Jersey** teats for the ultimate in massage

ProSquare®-D JPX

The Pinnacle of Milking Inflation Technology
