

transcend (tră-n-sënd)

1. To rise above in excellence or degree.
2. To overstep or exceed as a limit.

Available in
1, 5, 15, 30 and 55
gallon sizes.

The dictionary defines transcend as rising above and exceeding.

TRANSCEND's breakthrough formulation brings teat dips to a new level.

TRANSCEND is a premium 1% iodine barrier teat dip which is buffered to a stable pH. **TRANSCEND** contains a 12% triple humectant and emollient system providing advanced skin conditioning properties. The breathable barrier provides protection against both contagious and environmental bacteria between milkings.

Compare the features of **TRANSCEND vs. your current teat dip.**

1. Contains time tested and proven 1% iodine as the active ingredient. **TRANSCEND's** efficacy has been confirmed at a leading university using the A.O.A.C. Germicidal and Sanitizer Test.
2. Unlike many so called barrier teat dips, **TRANSCEND** forms a full barrier and leaves a protective plug on the teat end. **TRANSCEND's** barrier dries to a continuous, non-tacky film which provides protection between milkings.
3. **TRANSCEND** contains a blend of humectants, emollients and superfatting agents for unparalleled skin conditioning and feel. These humectants are superior to glycerin for moisture uptake and have been used in human skin conditioning products for years.
4. **TRANSCEND** is highly visible on the teat, making it easy to identify which cows have been dipped.
5. **TRANSCEND's** unique "drip-less" formulation stays on the teat which results in less mess, less waste and leaves more active ingredient on the teat.
6. Ready-to-use.
No mixing or measuring required.
