BOV-E-LYTE COMPLETE TR & BOV-E-LYTE WITH NATURAL E

*A palatable Oral Electrolyte Supplement
to aid in normal hydration, dry
matter intake, mineral balance and
energy levels of fresh cows*

ELECTROLYTES, ENERGY & VITAMINS

Diarrhea is a common problem seen in calves and adult cattle. Diarrhea by itself is a symptom, not a disease, and can be a result of any number of causes, such as, infections or nutritional problems. Death of animals suffering from severe diarrhea usually occurs from dehydration.

Diarrhea leads to:

- Dehydration
- Electrolyte loss
- Energy loss
- Microbial imbalance

Oral electrolytes in water are ideal during early stages of diarrhea. In advanced cases, intravenous fluids may be required and then the cow can be maintained with oral electrolyte solutions.

Rapidly available energy sources are required to correct energy deficiency completely by providing glucose or glucose precursor (propylene glycol) and fats. Amino acids aid animals in building tissues, and vitamins help to maintain normal appetite and well being. Minerals can aid to correct any mineral deficiency that may be present. Therefore, it is beneficial to supplement animals with electrolytes, energy, DFMs, vitamins and minerals during diarrhea for maintenance of body fluids, healthy microbial balance in the gut, normal appetite, digestion and natural immunity.

Complete protocol to manage diarrhea involves:

- Treating primary cause of diarrhea
- Replace fluid and electrolytes
- Replenish energy
- Reestablish microbial balance

Bov-E-Lyte Complete TR

*This specially formulated **palatable** oral nutritional supplement contains Yeast, Calcium, Magnesium, Electrolytes, Energy Vitamins with additional nutrients for dairy cows at freshening. Bov-E-Lyte Complete TR provides fresh cows*

with fluids, energy, minerals vitamins and direct fed microbials to aid in normal hydration, dry matter intake, mineral balance and energy levels.

Bov-E-Lyte With Natural E

Carefully formulated palatable, oral electrolyte supplement for ruminants including dairy cattle, beef, sheep and goats. This product provides fluids, a readily available source of energy, amino acid glycine, vital electrolytes, minerals and select vitamins. Bov-E-Lyte

With Natural E is specifically designed for ruminant animals of any age or size.

Bov-E-Lyte Product Benefits:

- Unique feature supplies a highly bioavailable natural source of Vitamin E
- Provides Vitamin A, Vitamin D3, Ascorbic Acid and certain B vitamins
- Great for animals that are dehydrated or shrunk due to stress from moving, sorting, hot weather, handling or vaccinations
