One Giant StepUP
for Hoof Health

StepUP

FOOT BATH ENHANCER

- Significantly reduces the amount of copper sulfate used in foot baths.
- **Environmentally friendly – less copper sulfate effluent to dispose of.**
- Enhanced wetting package provides surface activants and penetrants for more effective treatment of hoof problems.
- At suggested use rate, **StepUP** lowers the pH of the bath solution to 1.8 maximizing the antibacterial properties of the copper sulfate.
- Aids in cleaning hoofs.

DIRECTIONS FOR USE

50 Gallon Footbath / 500 cows

INITIAL TREATMENT (3-4 WEEKS)

Mix 1 gallon of **StepUP** with 10lbs of copper sulfate and enough water for a standard 50 gallon size footbath. This will be suitable for 300-500 cows depending on organic load.

CONTINUED TREATMENT

Mix 1 gallon of **StepUP** with 5lbs of copper sulfate and enough water for a standard 50 gallon size footbath. This will be suitable for 300-500 cows depending on organic load.

The amount of copper sulfate may vary depending on individual farm practices and frequency of hoof bath treatments.

FOR BEST RESULTS

- *Use a water only foot bath before the treated bath to rinse hooves prior to treatment.*
- *Minimum use recommendation - 3 days per week.*
- *Adjust the amount of copper sulfate to achieve maximum effectiveness on your dairy.*

Here is what dairymen who are using StepUP to enhance the copper sulfate in their foot bath rotation say...

“StepUP has greatly decreased the amount of copper sulfate we use without compromising our herd’s hoof health.”

ROLLIE MEHRKINS, MEHRKINS FAMILY FARM
LAKE CITY, MINNESOTA – MILKS 450 COWS

“We have been using StepUP for months and we save money by not using as much copper sulfate and we are getting the same results.

Plus StepUP is more environmentally friendly.”

DAVE BARSTOW - LONGVIEW FARM, HADLEY, MA
MILKS 200 COWS

“Since we started using StepUP, we have used a lot less copper sulfate without hurting the hoof health of our herd.”

RICHARD ANGLIN - MARICOPA, ARIZONA
MILKS 2,000 COWS
