

Multi-Purpose Treatment from Kinetic Laboratories

Eventually, E-10 Gasoline will be Nationwide.

What Does K100 Do?

K100 Prevents Phase Separation in E-10 Fuel.

Water contamination is problematic in all fuel tanks, but is unavoidable in boats and equipment with "open" fuel systems where the tank is vented to the atmosphere.

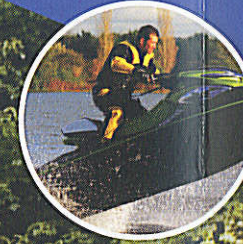

Over time this condensation will build up enough to cause phase separation, where E-10 fuel will separate into two layers of liquid: a top layer which is almost all gasoline and a bottom layer which is almost all ethanol (up to 75%) and water (and oil, in 2-cycle fuel).

Phase Separation:

- Leaves water in the tank to cause rusting and form ethanol sludge that will clog fuel lines
- Pulls the octane booster out of the fuel
- Removes the oil from pre-mix
- May make an engine difficult or impossible to start.

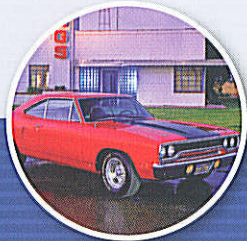

Use K100 as an ongoing treatment to keep water out of E-10 fuel and prevent phase separation from occurring. Once phase separation occurs, K100 cannot reverse the process and the fuel tank must be drained.

- ✓ **Eliminates all water problems**
- ✓ **Improves miles/gallons/hour, saves money**
- ✓ **Cleans fuel injectors & carburetors**
 - Better acceleration
 - Quicker starts
 - Smoother idle
- ✓ **Dissolves gums & varnishes**
 - Stops fuel line blockage
- ✓ **Reduces emissions**
 - Reduces CO emissions 80-90%
 - Reduces HC emissions 65-80%
 - Reduces oil fumes
- ✓ **Increases power**
 - Boosts octane 2 points
- ✓ **Lubricates**
 - Reduces friction & wear in fuel system
 - Reduces cold-start scuffing on 2-cycles
- ✓ **Stabilizes**
 - K100-MG extends fuel life & revitalizes old fuel
 - K100-MG is essential for fuel that sits more than 30 days

K100's Unique Organic Chemistry

K100's unique organic chemistry will even "fix" equipment that has been sitting a while and doesn't start — or runs roughly — by doubling the treatment, turning the engine over enough times to get the treated fuel throughout the system and waiting 1/2 hour for the treatment to take effect.

FUEL TREATMENT

**All Equipment • All Engines
All Fuels • All Year!**

For Diesel-Powered Equipment use:
K100-D or
K100-MD
(with enhanced stabilizers.)

For Gasoline-Powered Equipment use:
K100-G or
K100-MG
(with enhanced stabilizers.)

Order K100 Online at:
www.k100fueltreatment.com

Kinetic Laboratories, 1205 Balmer Rd., Youngstown, NY 14174

We Make Water Burn!

FUEL TREATMENT

G+MG

For Two and Four-Cycle Engines

**K100 Fuel Treatment is
the Bio-Based Solution to
ALL Water Problems!**

Water reduces the heat of combustion which means more smoke, less power, hard starting, rough idle, poor mileage, winter freeze-ups and phase separation in E-10. K100's unique bio-based chemistry eliminates all free water by encapsulating it and rendering it burnable as fuel!

K100 Eliminates Free Water:

- Improves mileage – saves money
- Makes starting easier
- Stops coughing, rough idle & hesitation
- Increases power & acceleration
- Reduces fumes & emissions
- Eliminates freeze-ups & vapor lock
- Prevents phase separation in E-10 fuel

K100 has a proven track record in eliminating all water-related fuel problems, improving miles/gallons/hour and extending equipment life.
